

A City of Houston comprehensive plan will:

- (1) Support diversity of **land development types** and **housing** based on market-driven demand;
- (2) Support ways to retain **housing affordability** at all price levels;
- (3) Support funding allocation for developing/operating/maintaining a **technology system** to provide a means for governmental and private entities to be coordinated and informed on plans for infrastructure, mobility, land use, and service programs;
- (4) Recognize the importance of improving our **natural environment** while protecting community and natural values;
- (5) Support **vehicular and mass transit improvements** throughout the Houston metro region;
- (6) Require that local and state transportation agencies **coordinate transportation plans and construction**.
